

BETERO ROADMAP

In this roadmap, the **Betero** team would like to highlight the features launching together with the main platform. Furthermore, we would like to point out what features and products will be launched later in the roadmap.

1. LAUNCH OF THE **BETERO** SPORTS PLATFORM

Roadmap Status: Launching now

The core **Betero** Sports Platform launches, and with it, many sub-features are launching as well.

FULLY FLEDGED SPORTSBOOK

- Support for an enormous amount of games and sports:

Soccer, Basketball, Tennis, Ice Hockey, Volleyball, Handball, Table Tennis, American Football, Baseball, Boxing, Rugby, MMA, Badminton, Waterpolo, Cricket, Golf, Cycling, Darts, Biathlon, and more;

- Support for eSports, FIFA, eFighting, and many more games.
- Live betting on running sports events
- Various betting opportunities are offered per game
- Accumulator bets
- Attractive odds

CASINO GAMES

Besides offering intensive possibilities to place bets in our sportsbooks, **Betero** is glad to offer our players a wide range of Casino and Slot games. By that, **Betero** becomes the major platform for all players looking to place bets on sports events but also for everyone looking to gamble in Casino games.

Among other the following main games are offered:

- Slots, Roulette, Cards, Poker, Blackjack, Lottery, Casual Games, etc.

SUPPORTED TOKENS AND NETWORKS

Betero is glad to offer acceptance of a wide range of cryptocurrencies and tokens. The following digital assets are accepted for deposits. Keep in mind that not all tokens are accepted on all networks.

- BTE, BTC, ETH, BNB, USDT, USDC, MATIC, AVAX, CRO

Users can play using any of these tokens. Possible winnings can be withdrawn in the same asset. There is no conversion to USD happening (like on many other platforms). This is especially beneficial as you are not exposed to price fluctuations of your crypto.

The following networks/blockchains are supported to deposit tokens:

- BNB Smart Chain, Polygon, Ethereum, Cronos, Avalanche

WEB 3 CONNECTIVITY

Starting on **Betero** is easy and can be done with simply connecting your wallet. You don't need to worry about login details such as username or password. Your wallet gives you full access to **Betero** and the endless possibilities to place bets.

Betero supports MetaMask and TrustWallet as the main wallets, as well as hundreds of more that become available with the WalletConnect technology.

Simply connect your wallet to **Betero** and start playing.

DEPOSIT & WITHDRAWAL

After you have connected your wallet to Betero, you can deposit a token in three simple steps:

1. Select the token you want to deposit
2. Approve the token to the smart contract
3. Deposit your desired amount

Your deposit will be credited within seconds, and you are good to go! Withdrawing is as easy. Select the token and amount to withdraw, and it will be back in your wallet in seconds.

2. **BETERO** PROFIT REDISTRIBUTION

Roadmap Status: Ready to Launch

The **Betero** Profit Redistribution is starting the following month after the platform goes live.

CASHBACK

25% of all profits made **are returned** to the players who placed bets and have a loss. Players who win their bets do not receive cashback. The **Betero** system calculates the total platform profit at the end of each month and redistributes it among the accounts of players who have a negative betting balance.

The Cashback functionality, which is unique to **Betero** becomes active the following month for all eligible players. The payouts depend on the Betero Club Tier of the player.

Players can connect their wallet to the Betero Portal to claim their cashback the following month. For example, if a player encounters some net losses in April, he can claim his cashback in May. The cashback will be reset every month. In our example, this means if the player hasn't claimed his cashback until the first of June, his cashback will expire.

STAKING REWARDS

25% of all profits made are used as **staking** rewards to incentivize BTE holders and attract liquidity providers. There will be a new pool set up on the [Betero Portal](#) page that receives the BTE obtained from converting the monthly profits of the platforms.

The **new Staking Rewards** pool runs on a special smart contract that sets the reward rate dynamically based on the amount of BTE tokens deposits of the month. The rewards then last for one month. The next monthly deposit resets the parameters and sets a new reward rate. The pool is going to have a lock time of 3 months.

With the rise of the [Betero](#) platform and higher volumes over time, the **Staking Rewards** pool is going to replace the current farming pools step by step. This ensures that no new BTE tokens enter the market.

BURN

15% of all profits made are used to **buy back BTE** and burn those tokens. This puts constant buy pressure on the BTE token and reduces the total supply.

The first burn is going to start with the profits made during the first month of the platform being live.

MARKETING

20% of all profits made are **spent on marketing** and the sponsoring of football clubs. This ensures **Betero** reaches a wide audience and can grow steadily.

ECOSYSTEM FUND

5% of all profits made go toward the ecosystem fund, which is used to build partnerships and increase Betero's exposure.

DEVELOPMENT

5% of all profits made are used to add new features to the platform, keep it secure, and secure funds to run the server infrastructure.

BETERO BOOST GAME

5% of all profits made are used to reward players of the Betero Boost Game. These rewards can be used by the players to boost future bets by 2x, 3x, or 4x. The boost can only be used with a new crypto bet, thus incentivizing people to bet more often.

The Betero Boost Game is going to be released later. The 5% allocated towards it will be used for its development to speed it up and be able to release it quicker.

3. BETERO PORTAL

Roadmap Status: Under development to launch soon

The core **Betero Sports** Platform launches, and with it, many sub-features are launching as well. The following weeks after the release of the main Betero platform, the team is going to introduce the **Betero Portal**.

The **Betero Portal** is a page where players can do various things related to the Betero platform and BTE token.

- Users can claim and withdraw their cashback from the previous months.
- Manage their BTE farms. The current Betero Fram page will be transitioned into the new Betero Portal.
- Deposit BTE to the new Staking Rewards pool to profit from the success of the platform.
- Manage their Club tier by staking more BTE to the pools available so that users can enjoy even higher cashback, for example.
- Once the Oracle is live, it will show recommendations on the portal. This feature is coming later.
- Bet Pump and Bet Boost are also features that will become available later.

4. **BETERO** MOBILE APP

Roadmap Status: Under Research

The team is thrilled to launch the Betero web-based app. At the same time, we are already in the planning stage of the Betero mobile app for iOS and Android.

The Betero Mobile App is based on our web-based app, making it easy to integrate it into the app.

✘ To provide some details about the app development, the following components are required for the Betero app:

- Ethereum-based wallet functionalities to securely create a wallet and store tokens.
- WalletConnect integration to connect to the existing Betero web-based app and show the content in the native Betero app
- Integrating the new Betero Portal smart contracts into the Betero app to provide a universal Betero app offering all Betero features and products in one place.
